

Ups and Downs

Draw your line graph in the grid below. Be sure to label the axis and to title the graph, including the number of the data table you are graphing. Then respond to the questions below.

1. Discuss your graph with your partner by describing what happens to the population of zebra mussels in Lake Miko from year to year.
2. What is the overall trend in the population of zebra mussels? Does it appear to increase, decrease, or stay the same? Write your response below.
